

OBJECTIVE :-

1. What was the overall survival rate?
2. How did survival differ across passenger classes (Pclass)?
3. Was there a difference in average fare paid by survivors vs non-survivors?
4. Which embarkation port had the highest survival rate?
5. Which ticket classes had the highest fares?
6. Did age influence survival differently for men vs women?
7. Which combination of class & embarkation had the lowest survival rate?
8. What was the combined survival rate by class, gender, and embarkation?
9. How did the average fare vary across passenger classes and embarkation points?
10. What was the gender distribution of all passengers?
11. What was the class distribution of passengers (Pclass)?
